EXECUTIVE SUMMARY

The Rock County Hazardous Materials Response Team was permanently established in 2004, pursuant to the Rock County Hazmat Emergency Response Plan as mandated by Wisconsin Statute 323.14 and under the authority granted to local agencies to respond to hazardous substance releases per Wisconsin Statute 323.71.

The County of Rock and the City of Janesville Fire Department agreed to intergovernmental cooperation pursuant to the Rock County Hazmat Emergency Response Plan, to utilize the Janesville Hazmat Response Team as a countywide response asset, identifying the team as the Rock County Hazardous Materials Response Team. The Rock County Hazardous Materials Response Team is funded by Rock County (Budget 21-2540-0000-00000).

This resolution authorizes the Board Chair and County Clerk to authorize a continued, contractual agreement with the City of Janesville for the provision of Hazmat response services for one calendar year. Under this agreement, the HAZMAT Response Team, composed of members of the Janesville Fire Department, will respond to Level “B” or Type III hazardous material incidents that occur anywhere within Rock County with the goal of arriving on scene in less than one hour. The Team will include approximately 40 personnel trained to the Hazardous Materials Technician level. This compliment of technicians would mean that a minimum of six to eight technicians are on duty at any given time.

The City is willing to provide services to Rock County with the caveat that it is cost neutral for the City of Janesville. Under this agreement, the County commits to pay for the fixed cost of keeping the team trained and response ready for the length of the agreement. The County also commits to pay the City for any incremental cost the team incurs should it make a HAZMAT response. Those costs include items such as employee salaries, benefits, and consumable materials associated with the HAZMAT response. The County reimburses the City’s costs and bills the party responsible for the incident to recover those direct expenses from the response.

Under Wisconsin State Statutes and Chapter 2.5 of the County Ordinances, Rock County can bill and collect from the identified, responsible party for the cost of responding to hazardous materials incidents. The amount collected each year would depend on how many times the team is called out and how long it takes to control the incident.

EXECUTIVE SUMMARY

On November 2, 2020 Rock County experienced a network storm which negatively affected the public safety radio system. To address these issues Rock County Information Technology is currently working to physically separate the radio system from the main county network, which will significantly reduce the chances of a network event like this from ever occurring again. The separation should be complete within the next couple of months pending work that needs to be completed by Spectrum and IT staff.

Another issue that occurred during the November network event was that the dispatch radio consoles locked up and telecommunicators were unable to transmit from their normal radio system/headsets. Use of our backup portable radios did not provide a robust enough signal for the prolonged event. Fortunately, the Beloit Police Department was able to send their mobile communications vehicle to the Center to provide radios with much better signal strength until the network issues could be resolved. While the use of Beloit PD's communications vehicle was very helpful during this event, it provided operational obstacles that would not be sustainable if a similar network event occurred again. Therefore we are requesting to purchase (5) XL-200M control station radios to install within the dispatch center so that staff may remain within the center versus the use of a mobile communications vehicle.

This unprecedented event exposed several issues concerning our dependency on a network system and steps that we must take to enhance our backup radio and paging systems. These suggestions may require additional funding before the end of the year and/or future budgets to make certain we have a very solid backup radio system to support the responders if such a prolonged event ever occurs again.
